Lauren Barrett
Mentorship Co-Chair

Case Competition Overview

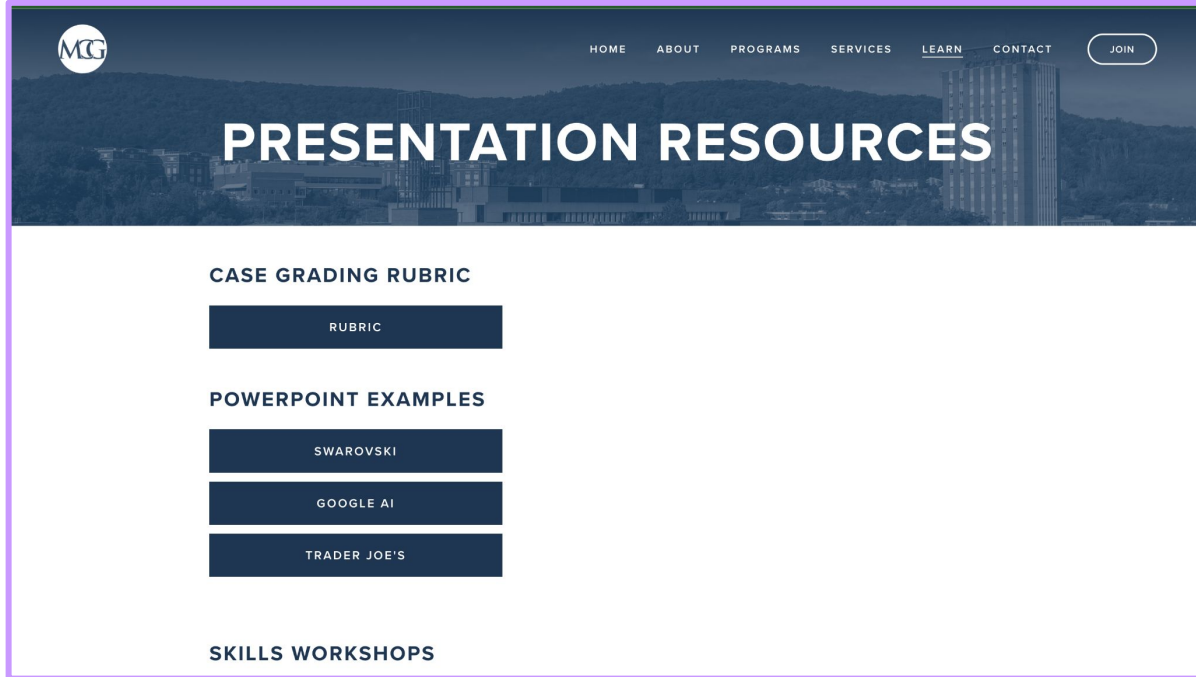

A **case competition** is a professional event in which teams **analyze a real-world business problem** and, within a defined amount of time, will research, brainstorm, and **develop innovative recommendations** to present to a panel of judges.

Combining elements of consulting, problem-solving, and public speaking, case competitions are widely recognized as **valuable simulations** of real business environments.

Expectations

Extra Case Resources

A screenshot of a website titled "PRESENTATION RESOURCES" by MCG. The page has a dark blue header with a cityscape background. The MCG logo is in the top left, and navigation links (HOME, ABOUT, PROGRAMS, SERVICES, LEARN, CONTACT) and a JOIN button are in the top right. The main content area is white and lists three categories: CASE GRADING RUBRIC, POWERPOINT EXAMPLES, and SKILLS WORKSHOPS. Under CASE GRADING RUBRIC is a dark blue button labeled RUBRIC. Under POWERPOINT EXAMPLES are three dark blue buttons labeled SWAROVSKI, GOOGLE AI, and TRADER JOE'S.

SKILLS WORKSHOPS

Agenda

The agenda slide outlines your presentation's structure and helps organize content

While it does not contain case-specific details, it said the stylistic tone of colors, fonts and shapes for the entire presentation

Agenda

Decide early whether you will be using round or sharp cornered shapes and stay consistent

Match the agenda order and running footer to order to one another

Industry Analysis

The industry analysis slide contextualizes the company within the broader scope of its competitors and makes it clear what products/services they offer.

Be sure to highlight recent changes using quantifiable measures or visually appealing graphs to help audiences understand the current competitive and consumer landscape.

When creating this slide focus on background information relevant to the case instead of detailing the entire company history.

Identify the company's competitors and research how they are performing against one another

Brainstorm current market trends, specifically shifts in consumer needs and preferences

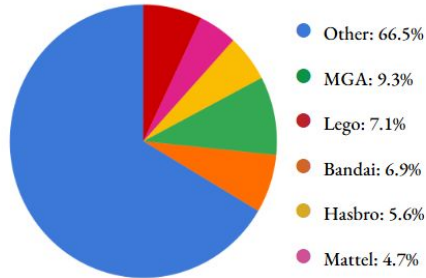

Consider visualizing data like market share or global presence with appealing graphs

Industry Analysis

Differentiate the colors
in your pie chart for
clarity

Utilize icons to keep
the wording concise

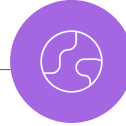

Problem Identification

The heart of your presentation lies in the problem analysis.

First, understand whether the scope of the case is broad or narrow.

Identify problems the company faces both from a consumer and internal viewpoint, considering industry trends, which you have identified in the slide prior, and major world events.

Ensure problems are specific to the company you are analyzing and backed by evidence, as accurate problem identification is essential for making effective recommendations.

Be sure your problems are company specific as opposed to general issues businesses around the world face

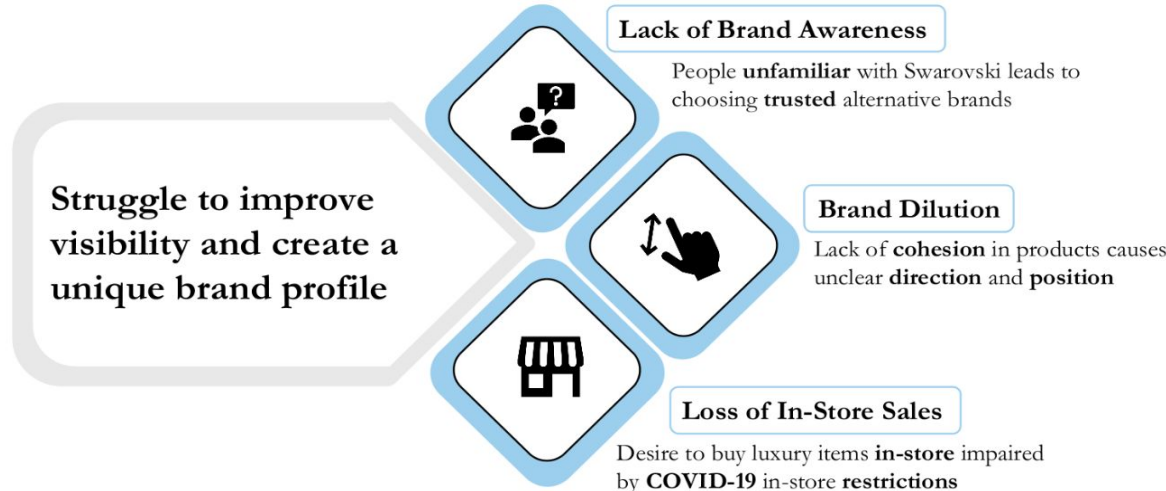

Take the time to question the problems that first come to your mind – this step should not be rushed

Problem Identification

Problem Identification

Keep details to a minimum
just start painting the picture

Recommendation Overview

Once you've identified the problems, recommendations must be creative, logical, and financially sound.

They should be long-term solutions that effectively address the identified issues, rather than merely being flashy.

Keep in mind that each recommendation will have individual slides that further explain the reasoning behind the proposed idea using visual aids, so keep this slide brief - you are simply outlining the recommendations here so that it is clear how the problems you identified in the slide prior will be addressed.

Consider similar projects the company or their competitors have taken on and their effect

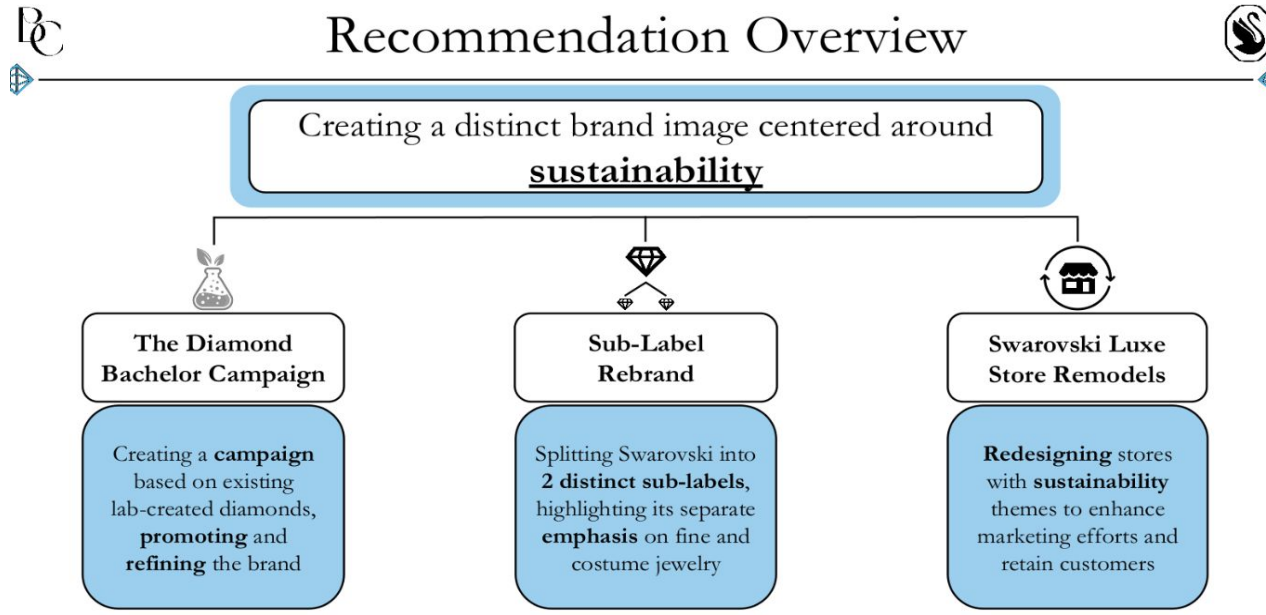

Think about the future of the company and the industry – aim for long term solutions

Try to avoid generic or cliché recommendations that the company has likely considered before

Recommendation Overview

Background | Problem Identification | **Recommendations** | Implementation | Financials | KPIs

6

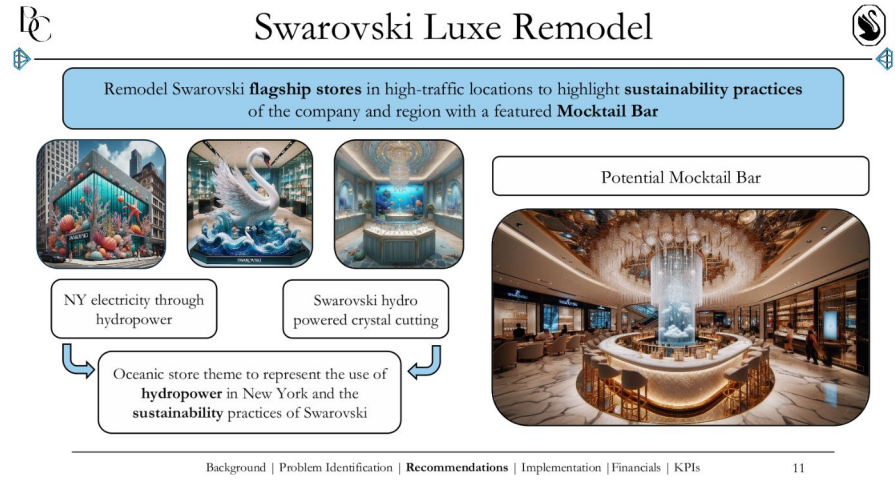

Recommendation 1, 2, & 3

Your recommendations should all be unique to the specific problem each will address.

Remember that the purpose of your slides is to lay the foundation of your recommendations, try not to make them too wordy.

Each recommendation should be thought out and fully developed, this will make the Q & A portion much easier for your group later.

Finally, **be creative!** Your recommendations might not come to you immediately, but by rereading the case a great recommendation just might strike you.

Recommendation 1, 2, & 3

Undiversified Company Offerings

Name the slide the title of the recommendation

Use graphs to show recent trends industries or products

Utilize the first slide to tie your recommendation to the corresponding problem you highlighted

Expansion History

Previous products moving away from the brick were non profitable

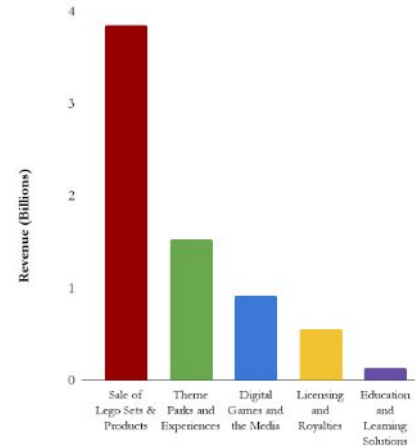

Loss of Core Mission

Cut other projects to avoid bankruptcy & refocus on bricks

Sustaining Growth

Continue to build upon the strong foundation through diversification

Revenue Streams

Bankruptcy Scare

Lego Universe Launch

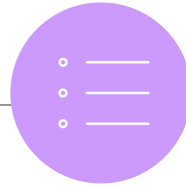

1st in Forbes' MVB

Sales fell for 1st time since 2004

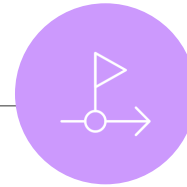

Implementation Timeline

For your implementation timeline, the key is to use the quarterly system utilized throughout the entirety of the business year.

Focus on 3-4 of the main aspects of each recommendation and be realistic as to when they could be implemented in the future.

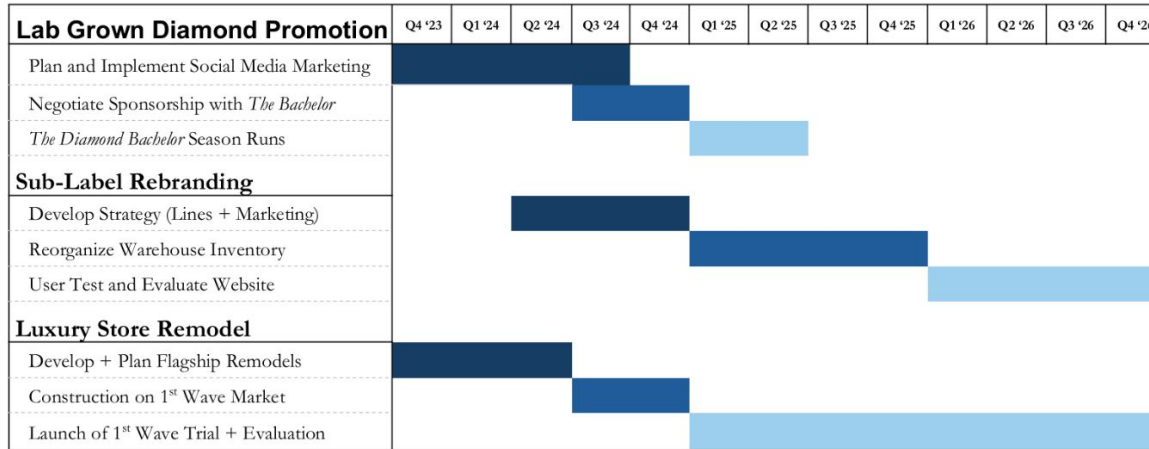

Your recommendations are not likely to all be able to start at the same time, so prepare for different starting times

Implementation Timeline

Implementation Timeline

Use Gantt charts to linearly show recommendation start times

Stages can overlap depending on recommendation needs

Try not to start implementation for all 3 recommendations at the same time

Financials Overview

Financials are well-thought-out projections designed to highlight the tangible fiscal aspects of a recommendation.

They should include financial projections for up to 5 years in the future and metrics such as recommendation costs, income, profit, and return on investment (ROI). Costs should be broken down per recommendation and based on industry standards. The key to nailing financials is to dive deep into the reasoning behind every cost included, providing substantial backing on how you arrived at your results.

Use resources like SEC EDGAR and the Company's investor page

Break down the costs and profit of all three recommendations

Use your appendix to show excel worksheets and breakdowns

Financials Overview

PPC 14

Use graphs/trendlines to show growth over time

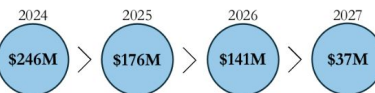

Import graphs from Excel to match theme

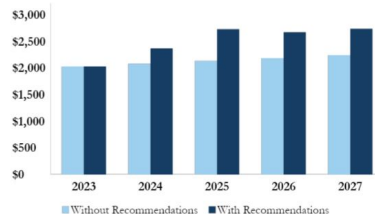

Financials

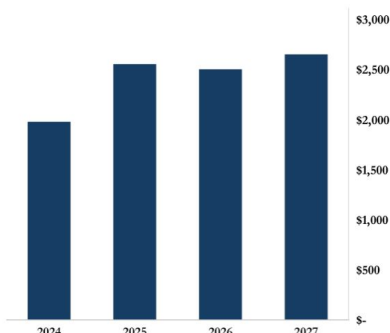

Total Expenses

Total Revenue (Millions USD)

Total Profit (Millions USD)

Background | Problem Identification | Recommendations | Implementation | **Financials** | KPIs

15

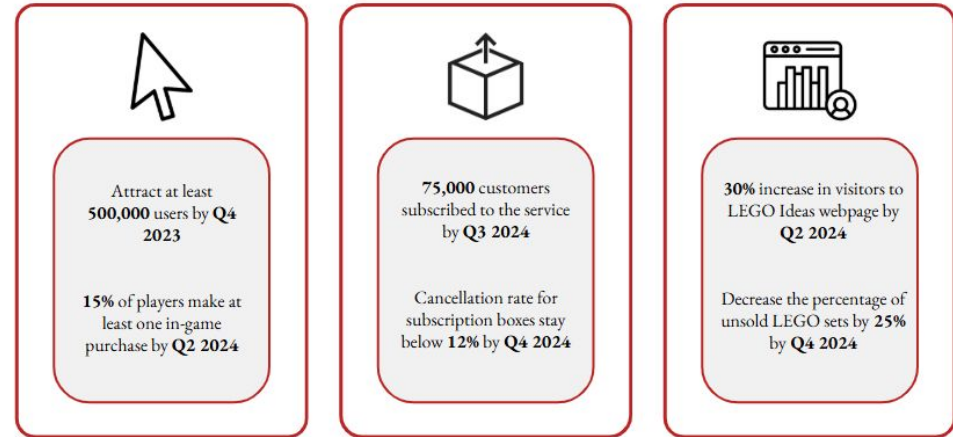

Key Performance Indicators

These are measurable values that help consultants track and assess the effectiveness of their strategies and recommendations

Your measurements should be realistic as to not give the company a false sense of reality in the future of the business

You want to include a quantitative statistic and a date for this goal to be reached

Key Performance Indicators

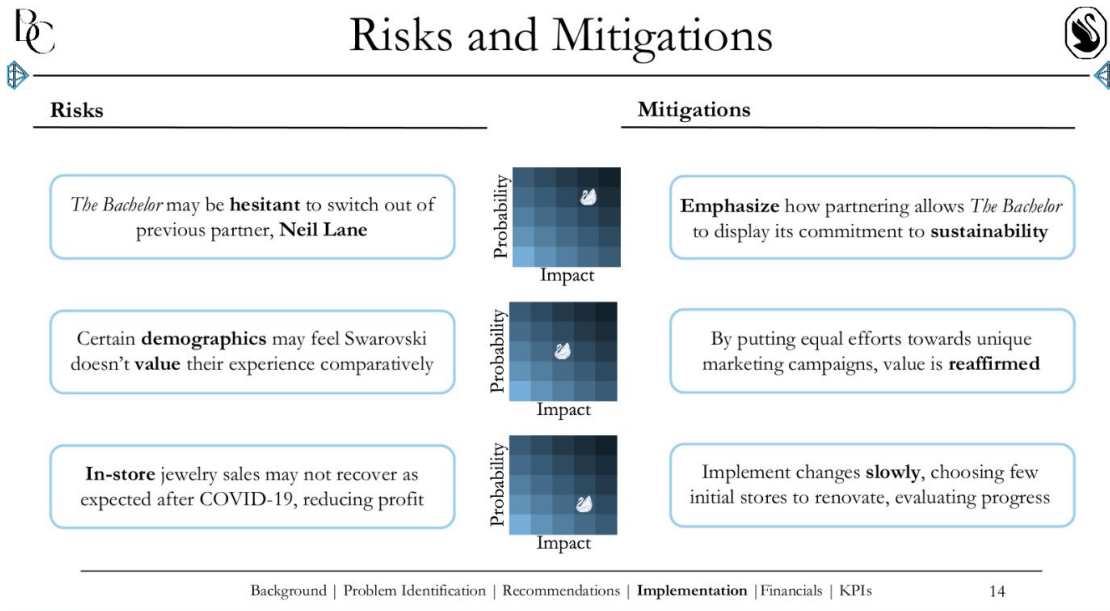

Background | Problems | Recommendations | Implementation | **Implications** | Executive Summary

Risks & Mitigations

Inherent in every recommendation is the potential for risk. Risks and Mitigations serve as a chance to preempt these possible issues and provide solutions.

To provide effective risks and mitigations, research similar products and find their issues. Dive into target age demographics and their preferred products, as well as potential company restraints.

Executive Summary

Executive Summary

Weak Online Gaming Presence

Partner with Roblox to expand LEGO's gaming portfolio and engage a broader audience through digitization

Dependency on the Physical Brick

Launch a LEGO Subscription Box to diversify LEGO's offerings by introducing a service-based product that increases customer convenience

Struggles Anticipating Demand

Integrate LEGO Ideas into the main website and app to improve consumer insights and demand forecasting

Background | Problems | Recommendations | Implementation | Implications | **Executive Summary**

Clear and concise summary of all the key points mentioned

Appendix / Q&A

Used for Q&A:

Can refer to these when answering questions

Includes all sources used for presentation
