

Cisco Spring 2026 Case Competition

What Is A Case Competition?

Case Competition Overview

A **case competition** is a professional event in which teams **analyze a real-world business problem** and, within a defined amount of time, will research, brainstorm, and **develop innovative recommendations** to present to a panel of judges

Combining elements of consulting, problem-solving, and public speaking, case competitions are widely recognized as **valuable simulations** of real business environments

Case Focus: Cisco Webex AI Assistance

The Spring 2026 Cisco AI Case Competition explores how AI Assistants embedded in Webex can enhance collaboration, improve productivity, and differentiate enterprise platforms in the era of hybrid work

Webex is a **trusted enterprise collaboration platform**, recognized for security, reliability, and enterprise-grade infrastructure across large, global organizations

As hybrid work becomes the norm, **user expectations for seamless, intelligent collaboration are rising** and Webex faces increasing pressure to improve adoption while competing with **Zoom and Microsoft Teams**

Cisco's **AI Assistant within Webex**, powered by proprietary enterprise data and platforms, can enable **smarter meetings, automated workflows, and deeper integration into daily work** creating sustainable platform differentiation

Case Reveal: Revitalizing Cisco Webex

Despite being a trusted enterprise collaboration platform known for security, reliability, and enterprise-grade infrastructure, **Cisco Webex** has struggled to match competitors such as **Zoom and Microsoft Teams** in user adoption and daily engagement

Central to Cisco's next phase of growth is its investment in **AI and automation**, embedding an **AI Assistant** into Webex to enhance meeting productivity, automate workflows, and integrate collaboration more deeply into everyday work

As Cisco repositions Webex for the future of hybrid work, leadership must determine **which AI-powered product and platform improvements can most effectively differentiate Webex**, increase adoption, and enable it to **outperform Zoom and Microsoft Teams** in a competitive collaboration market

Case Timeline

Date	Time	Session 1	Session 2
February 16th	2:00-3:00 PM	Case Launch Event (WiB x SWE)	
February 19-20th	11:59 PM	Team Sign Ups Due	Teams Assigned
February 23-26th	TBD	Research & Brainstorming Workshop	Flowchart Workshop
