EDUCATION

M.S., Industrial and Systems Engineering

Aug 2025 – Present

GPA: 4.00/4.00

Binghamton University, State University of New York, Binghamton, NY

Relevant Coursework: Applied Probability and Statistics, Computational tools (LateX, Python, R, Net Logo)

B.S., Industrial Engineering

Sep 2019 – June 2024

The University of Jordan – ABET Accredited, Amman, Jordan

Relevant Coursework: Applied Statistics, Data Mining (Logistics Regression, Statistical Data analysis and Techniques, Predictive Modeling), Discrete Event and Monte Carlo Simulation, Supply Chain And Logistics, Project Management, Stochastic And Deterministic Operations Research

PROFESSIONAL EXPERIENCE

Design for Reliability and Lifecycle Engineering Internship

Feb 2025 – Mar 2025

Owens Corning R&D Center, Granville, OH, USA

- Conducted literature review on blade wear detection
- Utilized Isograph software to perform Monte Carlo simulations for maintenance strategy optimization, supporting cost reduction and reliability analysis.

ISO Quality Auditing and Risk Management Intern

Oct 2023 – Dec 2023

Royal Scientific Society, Amman, Jordan

- Assisted in the preparation of the annual ISO internal audit report, including documentation and reporting of non-conformities, using Excel, Power BI, and PowerPoint.
- Performed risk analysis and SWOT assessment to identify organizational risks, weaknesses, and improvement areas in alignment with ISO quality requirements.

ACADEMIC PROJECTS

Predicting S&P 500 Stock Outperformers using Multivariate Data Analysis

April 2026 – Present

- Predicted S&P 500 stock outperformers using sector-specific logistic regression and 15 years of Compustat/CRSP data, with portfolio backtesting across multiple market regimes.
- Information-Theoretic Analysis of Children's Proximity Networks: Applied Shannon entropy, KL divergence, and mutual information to wearable-sensor data using Python to analyze social interaction diversity, similarity, and dyadic preferences.
- Statistical Analysis of Quiz Score Distributions Across Different Forms: Applied Minitab and Excel for exploratory and inferential statistical analysis, including ANOVA, to evaluate quiz score distributions and performance differences across exam forms.

COMPUTER SKILLS

Programming Languages: Python, RStudio

Tools & Libraries: Microsoft Visio, Pandas, Sci-kit Learn, Matplotlib

Modeling & Simulation: Discrete Event Simulation Using Arena and Monte Carlo Simulation Using Microsoft Excel

General Applications: MS Office

Statistical Analysis & Data Mining: SPSS, Minitab
